

Sandi is a dynamic, passionate data management executive with an outstanding record of leadership and excellence in developing, implementing, influencing, and communicating data programs and strategies for large, complex business environments. Currently, Sandi is a SVP and the Global Head of Data Management & Governance at AIG. In this role, she leads the organization in maturing data frameworks, programs, and practices, including Data Governance, Data Stewardship, Data Privacy, Data Quality, Metadata Management, and Master and Reference Data Management. She has 30+ years of experience in software development and data management in the insurance industry working for companies such as The Hartford, Travelers, Cigna, and AMS Services (now Vertafore). Sandi is a Board of Directors and Executive Committee member for the Insurance Data Management Association (IDMA), President of DAMA New England, and holds the CIDM, CDMP, and ACE designations from IDMA, DAMA, and ACORD respectively. In 2022, she was honored by IDMA's Board of Directors who elected her a Fellow in Insurance Data Management (FIDM). Sandi has an Executive M.B.A from the University of Connecticut and a B.S. in Computer Science and Math from the University of Hartford.
